
Release Note FleetGuard ver 3.0.0

Date 10.12.2009

This is a general information to all users of FleetGuard, a brand new web application will be launched on the 13th December 2009

Running version	ver. 2.5.3.3
Planned release date	Week 50 – 2009, date 13 th December
Next version	ver. 3.0.0

Information

On the 13th December we will launch our brand new FleetGuard application. This application is improved in almost all areas, such as response time, maps, user interface, compatibility and much more.

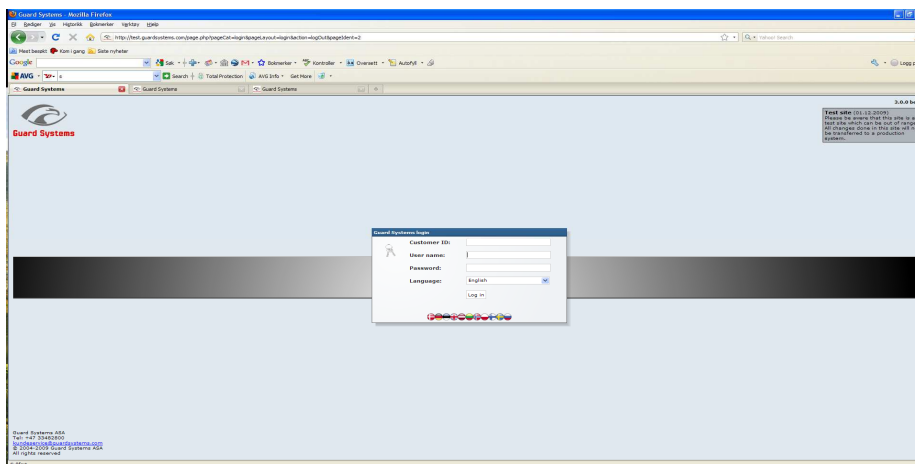

User documentation will be available from login page as new application is launched.

Due to the convert process FleetGuard web application will **NOT** be available on the 13th, from 11:00 until approx 15:00 (UTC time).

All messages from units will be received during the converting period, and will be available as soon new FleetGuard are up running again. Customers will be informed about system converting on <http://fleet.guardsystems.com> during upgrade period.

A test team will perform system check as soon as new system is up running.

Web login page will look like picture attached as system are available, existing customers shall use their current username and password, customer Id to be neglected.

All comments and feedback shall be directed by e-mail to ; fleetsupport@guardsystems.com

On behalf of Guard Systems Group

Morten Berntsen
